---

Please be advised that the Sunshine Canyon Landfill Local Enforcement Agency (LEA) received and approved a Joint Technical Document (JTD) Amendment to the Solid Waste Facility Permit for the Sunshine Canyon Landfill. The LEA is certified by the Department of Resources Recycling and Recovery (CalRecycle) to enforce state laws and regulations at solid waste sites within the jurisdiction of the Sunshine Canyon Landfill Local Enforcement Agency.

**Description of Project and LEA's Determination**

The Sunshine Canyon Landfill is an approximately 363-acre existing landfill site located at 14747 San Fernando Road in Sylmar, California. Pursuant to the SWFP, the landfill is permitted to accept 12,100 tons per day during the hours of 6:00 am to 6:00 pm, Monday through Friday and 7:00 am to 2:00 pm on Saturday.

On April 23, 2019, the LEA received an application package from Browning Ferris Industries of California, Inc. (BFI) for a JTD Amendment for the Sunshine Canyon Landfill. The JTD Amendment was submitted in response to the recently issued 5-year permit review report and updated the following sections:

- Waste Flow Projections & the Remaining Site Life - The waste flow projections and the remaining facility capacity and site life were updated.

- Proposed Phasing Limits - The previous conceptual master excavation and final grading plan, including the terminal stability buttress, were revised because of the on-going iterative process of designing and constructing liner phases to ensure they are stable on an interim and global basis. The current conceptual phasing is discussed in Section C.3.9.
- Gas Collection System - The JTD was updated to show improvements to landfill gas collection system.
- Site Plans - The existing and proposed site plans were updated to reflect current conditions.
- Equipment & Personnel List - The equipment and personnel list were updated to reflect current levels.
- Odor Mitigation - The JTD was updated to incorporate the odor mitigation practices.
- Gabion Cubes - The use of gabion cubes was described in detail and a figure was included.
- Posi-Shell & Closure Turf - The use of intermediate cover enhancements including the use of Posi-Shell and Closure Turf were included in Section B.5.
- Flare 11 - The placement of Flare 11 in the area of Flares 9 and 10 and the LFGTE facility was updated. More information on the placement of this flare is included in Section B.7.2.2.
- Non-Water Quality CAP and Cost - The Non-Water Quality Corrective Action Plan (CAP) and its cost estimate were updated.
- Closure Phasing & Maintenance Cost - The closure phasing and the closure & post-closure maintenance cost estimates were updated.

The LEA has determined that the application package is consistent with all applicable certified and/or adopted CEQA documents, is consistent with State Minimum Standards, and does not conflict with the terms and conditions in the current solid waste facilities permit. On May 23, 2019, the LEA approved the JTD amendment.

#### **Where copy of application can be reviewed**

A copy of the approved application for the JTD Amendment is available for public review by appointment in the LEA office located at 221 N. Figueroa Street, Suite 1250, Los Angeles, CA 90012 or online at [SCLLEA.org](http://SCLLEA.org).

#### **LEA Contact Information**

If you have any questions after reviewing the above information or would like to schedule an appointment to review the JTD Amendment, please contact David Thompson at (213) 252-3348. You may also email the LEA regarding this matter at [Jose.Gutierrez@lacity.org](mailto:Jose.Gutierrez@lacity.org)

#### **Appeals Process Information**

For information on the appeals process to challenge the LEA's approval of the RFI Amendment, you may contact Jose Gutierrez at (213) 252-3348.
